Leadership communications involve representing your discipline to a range of audiences, including policy makers. This workshop will help participants hone verbal and non-verbal communication skills and strategies essential for making a good first impression, developing a rapport with your audience, tailoring a message, and handling discord. Because, by their nature, leadership communications are often outside the narrow scope of an individual’s research, a focus will be on learning to take ownership of and present messages that originate from other groups within one’s institution or professional society.

Barbara Sawrey has taught workshops on leadership communications for over a decade. She was part of the team that developed the Extraordinary Leaders curriculum for the American Chemical Society, where she is a member of the board of directors. Dr. Sawrey serves in several other leadership positions, including on the Board of Governors of the Gemological Institute of America, the Board of Directors of the National Conflict Resolution Center, and the WASC Senior College and University Commission. An award-winning educator, she was UC San Diego’s Associate Vice Chancellor and Dean of Undergraduate Education from 2007-2017.
